

MOOVIT Mobile App

All Your Mobility Options In One App

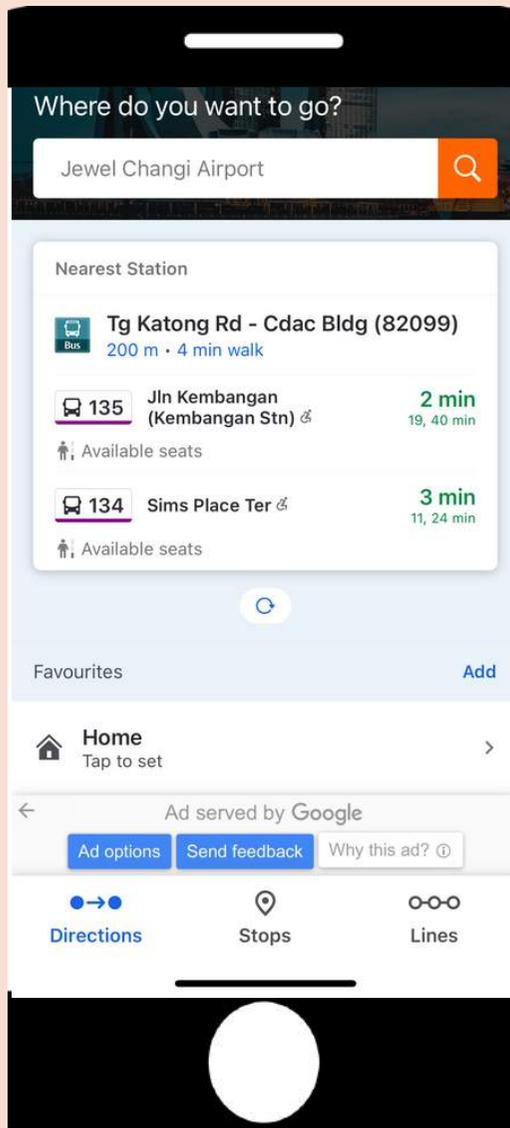

Scan this QR code or search for the MOOVIT mobile app on the Apple App Store or Android Google Play and install it on your phone. Follow the steps below to get yourself set up!

MOOVIT Mobile App

All Your Mobility Options In One App

Moovit has three tabs at the bottom of the screen, so you can easily navigate through the app.

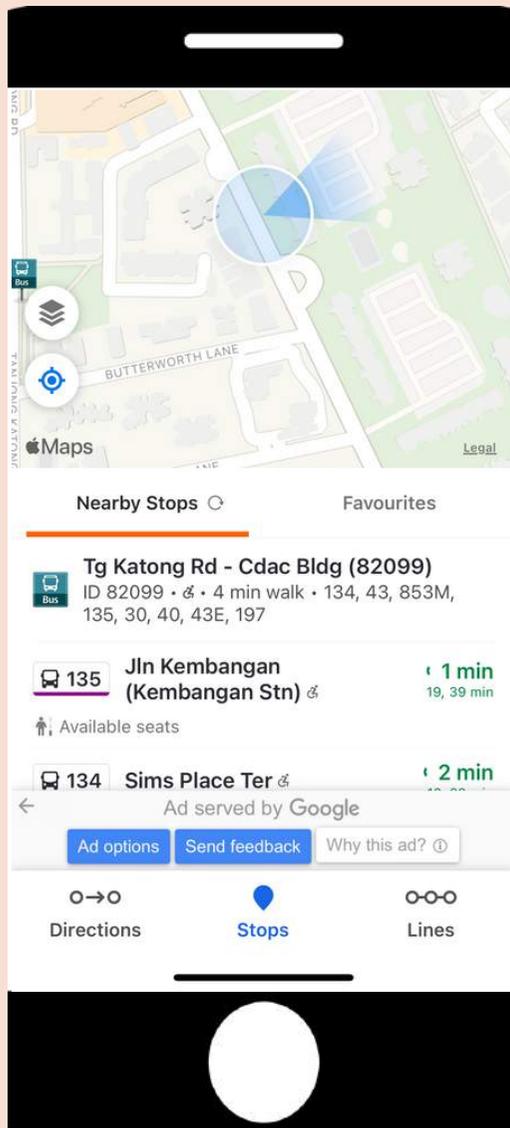

Directions: on this tab, you can plan a trip to wherever you want to go and get quick access to your Favourites and recent trips.

Once you've chosen your starting point and destination, you can pick the route that suits you most, based on duration, departure or arrival times and transit types.

Stops: here you'll find the map of stations and ride-sharing options (shared bikes, scooters, shares cars) around you.

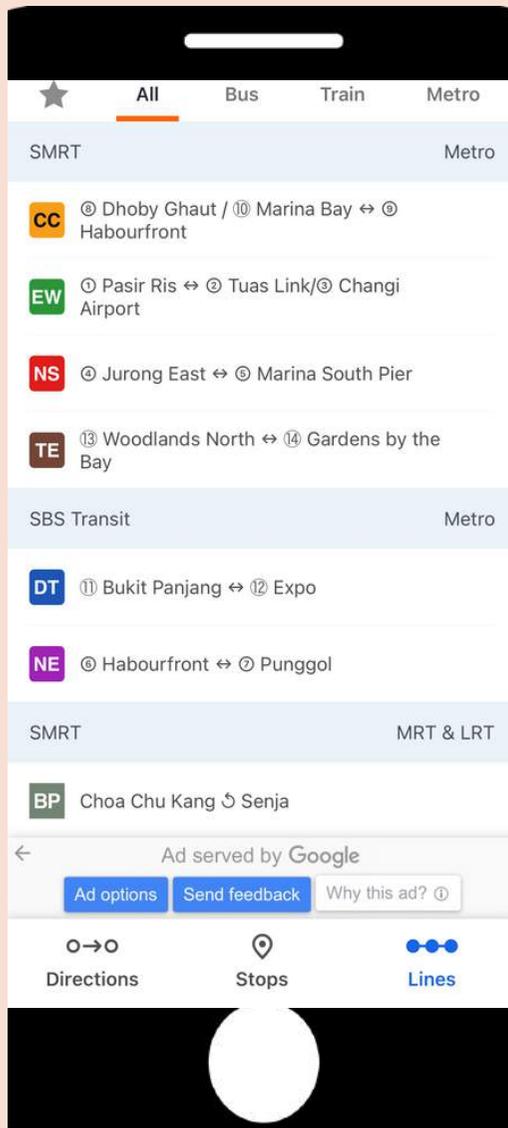

Tapping the station icon will give you a list of lines that stop there and their next arrivals (Real-time arrivals are shown in green, while arrival times that appear in black are based on scheduled time).

Marking a station as a Favourite will allow you to easily see all its lines and schedules, even if you're not next to it.

Lines: this tab allows you to search for a specific line and get its list of stops, route on map, and next arrivals for all its stations.

You can also get the full schedule for a specific station (i.e. the lines that stop there and their next arrivals).

Favouriting a line will give you quick access to it (under the star tab), and will notify you of any major changes to it.
